

Pellet Therapy Outline & Therapy Costs

		Women	Men
STEP 1	Get your Hormones Checked & Evaluated	\$495	\$495
	Your first visit will be in-office lab work (fasting required) and your initial hormone therapy questionnaire. Two weeks later, an in-person comprehensive evaluation. This evaluation includes a physical examination, a thorough in-depth evaluation of your lab results, and a customized treatment plan created just for you.		
STEP 2	Pellet Insertion Procedure	\$525	\$825
	At your first pellet insertion appointment we'll provide care instructions and schedule six week follow up bloodwork. To prevent a decline in hormone levels we will also schedule your next pellet insertion and pre-insertion lab work two weeks prior.		
STEP 3	Six Week Follow-Up Bloodwork		
	Six weeks after your first insertion we check certain hormone levels to make sure your levels are optimal.		
STEP 4	Maintaining Your Hormones	\$525	\$825
	To maintain optimal results pellet insertions are typically done every 3 months for women and every 4-5 months for men. Follow-up bloodwork is also done two weeks prior to every reinsertion.		
Typical Yearly Cost	Annual Full Panel Blood Work & Eval	\$495 (1x)	\$495 (1x)
	Pellet Insertion Procedure	\$525 (4x)	\$825 (2-3x)
	Approximate Total Annually	\$2595	\$2145-\$2970

** Lab work is included in the fees above. If using an outside lab, results dependent appointments can not be scheduled until the patient provides lab results to the office.*

*** Other costs associated with Hormone Replacement Therapy may include recommended compounded prescriptions and booster injections. Rest assured, LivingYoung Center will not surprise you with unexpected add-on fees and you can count on us for transparent pricing.*
