

Pellet Therapy Outline & Costs

		Women	Men
STEP 1	Meet with a Provider	\$75	\$75
	Get your care established with one of our providers. In this visit you'll explore how this program works and what symptoms you're experiencing. We will ensure you're a great candidate for pellet therapy and then get you scheduled for lab work.		
STEP 2	Get your Hormones Checked & Evaluated	\$495	\$495
	In-office lab work (fasting required). Two weeks later, an in-person comprehensive evaluation. This evaluation includes a physical examination, a thorough in-depth evaluation of your lab results, and a customized treatment plan created just for you.		
STEP 3	Pellet Insertion Procedure	\$525	\$825
	At your pellet insertion appointment, we'll provide care instructions and schedule any necessary follow up bloodwork. To prevent a decline in hormone levels, we will also schedule your next pellet insertion.		
STEP 4	Follow-Up Bloodwork	6 weeks	4 weeks
	After your first and second insertion, we check certain hormone levels to make sure your levels are optimal. Further lab work can be expected annually, with the appearance of any symptoms and/or with dosage adjustments.		
STEP 5	Maintaining Your Hormones	\$525	\$825
	To maintain optimal results, pellet insertions are typically done every 3 months for women and every 4-5 months for men.		
Typical Yearly Cost	Annual Full Panel Blood Work & Eval	\$495 (1x)	\$495 (1x)
	Pellet Insertion Procedure	\$525 (4x)	\$825 (2-3x)
	Approximate Total Annually	\$2595	\$2145-\$2970

** Lab work is included in the fees above. If using an outside lab, results dependent appointments can not be scheduled until the patient provides lab results to the office.*

*** Other costs associated with Hormone Replacement Therapy may include recommended compounded*
